

Sophos Mobile Control

Sophos Mobile Control enables secure mobile productivity and collaboration for your business.

Sophos simplifies Enterprise Mobility Management (EMM) for BYOD environments while maximizing data security. Sophos Mobile Control (SMC) offers an intuitive management console to oversee apps, devices and data. SMC delivers comprehensive security, from superb anti-malware to encrypted file sharing for sensitive corporate documents.

Highlights

- ▶ Single solution for all the latest mobile platforms
- ▶ Role-based web console
- ▶ Deploy policies and apps over the air
- ▶ Self Service Portal
- ▶ Automatically monitor device compliance
- ▶ Remotely locate, lock, and wipe devices
- ▶ Distribute corporate documents to user devices
- ▶ Enable secure collaboration via the Secure Workspace
- ▶ Web Filtering, Antivirus and Security Control on Android devices
- ▶ On-premise and SaaS deployment options

Master mobile management

Mobile comes in many forms: phones, tablets, phablets, iOS, Android, Windows Phones, corporate supplied, or BYOD. Master it all with a single, simple and intuitive console. Administrators can easily manage various devices, set policies and compliance rules while also securing access to emails and corporate documents. In addition, via the Self Service Portal users can perform many functions themselves, at any time. When devices are lost or stolen they can be locked or wiped. Security and compliance rules are enforced automatically.

Mobile encryption

SMC ensures corporate documents remain secure by encrypting them. So even when files are shared, placed on cloud storage, or distributed they remain secure. This is the ultimate protection for corporate data that follows the document beyond a particular device, a container, and even into the "cloud."

Integrated security

Sophos is the only vendor to provide an integrated antivirus and Web Filtering for Android devices managed in the same way as other computers. Our Mobile Security app seamlessly integrates into your SMC console. Centrally manage your malware protection, keeping your Android users safe from malicious apps, websites, and other threats. Our built-in Web Filtering also allows you to prevent your users from accessing malicious websites.

Network access control

Reduce your risk of data breaches by setting SMC to block network access based on the device's compliance status. Automatically detect uncompliant mobile devices the moment they attempt to connect to your network, and block their access to Wi-Fi and VPN. SMC integrates perfectly with Sophos UTM and supports Checkpoint and Cisco.

Comprehensive security

Only Sophos can provide you with an integrated and comprehensive security solution that includes network, endpoint, server, cloud, encryption, and mobile.

One user = one license and low overhead

Our solutions reduce costs using a simplified per-user licensing. One user = one license. No matter how many devices they have or use. SMC also keeps your operating costs down with very simple installation and upgrade procedures, as well as low user support due to the Self Service Portal.

Sophos Mobile Control

Mobile Device Management (MDM)

- Manage and control iOS, Android (including Samsung KNOX) and Windows Phone 8.1
- Configure device policies and deploy them over-the-air
- Enforce built-in security features such as passcodes and device encryption
- Full loss and theft protection with lock, wipe, and locate
- Set up group-based compliance policies

Mobile Content Management (MCM)

- Transparent encryption of each file keeps documents and data safe—not just in the office, but everywhere the users go
- A Corporate Document Store distributes documents centrally to all devices
- Manages the container for corporate documents centrally and locks or wipes it when compromised
- Accesses content from various cloud storage providers like Dropbox, Google Drive, Microsoft OneDrive, Egnyte, and various WebDAV compatible solutions

Mobile Application Management (MAM)

- Securely distributes apps to individual users or groups
- Deploys iOS managed apps for added control over app data
- Password protects apps accessing corporate data for complete security
- Blacklists apps that might be risky or waste resources
- Supports enterprise purchasing of apps via Apple's Volume Purchasing (VPP)

Mobile Email Management (MEM)

- Distributes email settings, getting your users productive in minutes
- Controls access to email via a secure email gateway based on the device posture
- Selectively wipes all corporate emails, once a device is lost or stolen or if the employee leaves the company in BYOD environments

Anti-malware and Web Filtering for Android

- Automatically scans all newly installed apps for malware
- Quarantines infected devices
- Protects users from accessing malicious websites and blocks web pages by category
- Controls Wi-Fi, NFC, Bluetooth, access to other app stores, and device encryption

Controlled Network Access

- Constantly monitors device health and detects jailbreaks, blacklisted applications, or insecure settings
- Integration with Sophos UTM enables admins to block Wi-Fi and VPN access based on compliance status of the device
- Out-of-the-box interfaces control network access via Checkpoint and Cisco ISE

New in Version 5

- Corporate Document Store
- Allows editing of documents
- Smooth new UI reduces time for all typical admin tasks
- Supports Windows Phone 8.1
- Supports Samsung KNOX
- Mobile-ready Self Service Portal simplifies enrollment
- Management of Secure Workspace on iOS and Android
